

Goal

Making constant improvements towards sustainability in the packaging industry requires some out-of-the-case thinking. We recognize that, as a manufacturing and packaging partner, our actions have a impact on our customer's environmental footprint. **MSI Express aims to be a primary enabler for corporations to meet their own sustainability goals.**

Today

MEASURE

- ◆ Energy efficiency audits completed at all plants.
- ◆ MSI Express uses a shared ERP and waste recording system across all plants, enabling best practice sharing and monthly KPI reviews at senior levels. For example today at MSI:

100% of all mayo bottles are post consumer recycled

1.6 million cases of recycled cardboard

840 million stick packs produced to reduce plastic bottle waste

MODIFY

- ◆ Complete facility improvements to realize meaningful efficiency gains.

Install LED lighting

+

Update HVAC equipment

+

Replace antiquated equipment

=

Anticipated
~3000 tons/year decrease in CO₂ emissions

Our Road Map

INNOVATE

MSI Express continues to pursue innovative answers and high-impact results. The following are key sustainability programs currently in process.

Education

- ◆ External - Guide customers on how they might decrease packaging waste. Include sustainable packaging options in customer pricing quotes.
- ◆ Internal - Establish internal training program on waste reduction.

Energy Conservation

- ◆ Transition to 100% carbon-free energy resulting in an anticipated ~2300 tons/year reduction in CO₂ at our facility in Grand Prairie, Texas.
- ◆ Install waste heat recovery system and water usage reduction.
- ◆ Quantify GHG emissions and waste.

Recycling

- ◆ Source sustainable options for major packaging types.
- ◆ Internal waste reduction through process improvement.
- ◆ Expand our giveaway program for underfilled goods.

How can we help you expand your sustainability goals?
